

agroforestry practices and concepts pdf

Agroforestry is a land use management system in which trees or shrubs are grown around or among crops or pastureland. This intentional combination of agriculture and forestry has varied benefits, including increased biodiversity and reduced erosion. Agroforestry practices have been successful in sub-Saharan Africa and in parts of the United States.

Agroforestry - Wikipedia

This section introduces a range of climate-smart agriculture (CSA) practices and technologies within seven entry points for CSA; soil management, crop management, water management, livestock management, forestry, fisheries and aquaculture, and energy management. Practices are understood broadly as ways of doing things, for example, precision farming, tillage, and fertilization; these are all ...

Michael "Skeeter" Pilarski founded Friends of the Trees Society in 1978. Since 1988 he has taught 36 permaculture design courses in the US and abroad. His specialties include earth repair, agriculture, seed collecting, nursery sales, tree planting, fruit picking, permaculture, agroforestry, forestry, ethnobotany, medicinal herb growing, hoeing and wildcrafting.

Friends of the Trees Society

Permaculture is a system of agricultural and social design principles centered around simulating or directly utilizing the patterns and features observed in natural ecosystems. The term permaculture was developed and coined by David Holmgren, then a graduate student at the Tasmanian College of Advanced Education's Department of Environmental Design, and Bill Mollison, senior lecturer in ...

Climate-smart agriculture (CSA) goes beyond new technologies and practices like drought resistant varieties or precision farming. To achieve the multiple objectives of productivity and food security, enhanced farmer

resilience and reduced greenhouse gas emissions, CSA must adopt various systems perspectives. These include landscapes and ecosystems, as well as value chains.

Étymologie. Le terme agroforesterie est la traduction d'un néologisme anglais (« agroforestry ») apparu dans les années 1970. Il peut prêter à confusion car l'agroforesterie moderne diffère fortement de la foresterie en ce que les arbres n'occupent généralement que moins de 20 à 30 % de la surface agricole utile. Les termes traditionnels en français sont complantage ou complantation ...
