**PDF Introduction To Environmental Impact Assessment**

Sample answer: Environmental science is what we know about the workings of the environment; environmentalism is a social movement dedicated to protecting the natural world from the negative effects of human actions.

**An Introduction to Environmental Science - BBHCSD**

The study of environmental biophysics probably began earlier in man's history than that of any other science. The study of organism- environment interaction provided a key to survival and progress. Systematic study of the science and recording of experimental results goes back many hundreds of years.
