The Physical Origins of Partial Differential Equations The initial condition is $u(x,0) = 0$ and the boundary condition is $u(0,t) = 0$. To solve the equation go to characteristic coordinates $\xi = x - ct$ and $\eta = t$.

Applied Partial Differential Equations, 3rd ed. Solutions

Chapter 1 we discuss solutions to the equilibrium equations of one-dimensional continuous systems. These are formulated as boundary-value problems for scalar ordinary differential equations. The Green's function technique and the minimum principle are discussed. Chapter 2 deals with the diffusion equation, in particular, the heat propagation equation.
