Mechanical Engineering Detailed Syllabus New - MAKAUT,

Definitions: The definitions of the terms used throughout this book will be repeated in a number of chapters. The reason for this seeming duplication is to clearly explain the concepts so that a clear understanding is given as to what an accident, near miss incident, or other concept is and how it is defined.

In mathematics, physics, and engineering, a Euclidean vector (sometimes called a geometric or spatial vector, or "as here" simply a vector) is a geometric object that has magnitude (or length) and direction. Vectors can be added to other vectors according to vector algebra. A Euclidean vector is frequently represented by a line segment with a definite direction, or graphically as an arrow ...

Dane Wigington GeoengineeringWatch.org. The "Camp Fire" is now officially the most destructive wildfire in California history. This is a tragic fact following an entire summer of extreme fire destruction in the US west. The official narrative from Washington is that the extreme fires are due to a lack of forest management, this is a blatant lie. Fire season is now a year round threat in so ...

The horrific environmental and climate decimation being created by climate engineering are far beyond catastrophic. Though there are countless forms of anthropogenic damage to the planet and the climate system, global geoengineering operations are mathematically the most destructive of all.If public apathy regarding the climate engineering assault remains, if academia continues to lie about ...
