

m is for data pdf

Despite the moniker "data monkey," we information workers are often more like data magicians. Our data seldom enters our world in a ready-to-consume format; it can take hours of cleaning, filtering, and reshaping to get things ready to go.

Power Query is one component of the Power BI (Business Intelligence) product from Microsoft, and M is the name of the programming language created by it. As more business intelligence pros begin using Power Pivot, they find that they do not have the Excel skills to clean the data in Excel; Power Query solves this problem.
