progress in motor control pdf

The Progress in Motor Control (PMC) Conference is one of the primary international forums for exchanging fundamental information between sub-disciplines in the field of movement studies. Now in its eleventh year, PMC XI is co-hosted by the International Society of Motor Control and The Miami Project to Cure Paralysis.

Progress in Motor Control XI -- July 19-22, 2017

Motor control has established itself as an area of scientific research characterized by a multi-disciplinary approach. Its goal is to promote cooperation and mutual understanding among researchers addressing different aspects of the complex phenomenon of motor coordination.

This unmarried quantity brings jointly either theoretical advancements within the box of motor regulate and their translation into such fields as stream issues, motor rehabilitation, robotics, prosthetics, brain-machine interface, and ability learning.

New PDF release: Progress in Motor Control: Theories and

The area of motor control is a relatively young but thriving field of research. Over the last few decades it has grown into a broad multidisciplinary area of research spanning the disciplines of neurophysiology, kinesiology, neuroscience, robotics, psychology, nonlinear dynamics, biomechanics and biology, with no specific rank order.
