Proofs and Refutations What follows is the first part (minus the introduction) of Imre Lakatos's influential essay Proofs and Refutations. It's written as a dialogue between fictional students and teacher, as they discover and prove (and disprove?) Euler's  $V - E + F = 2$  formula, much like we did in class.

### **Proofs and Refutations - Imre Lakatos - Complete Review**

Abstract. Since the appearance in print of Lakatos's™ Proofs and Refutations, much lively discussion has taken place between philosophers and mathematicians. It is by now generally accepted that it was a fine piece of work which, though it did not by any means settle all of the issues it raised, helped us to redirect our attention toward the dynamics of mathematical discovery.
