Once you click on Download link for Java client then you should be able to download a [â€œselenium-java-2.31.0.zip](#)â€• ZIP file. Once you successfully download the ZIP file, extract the ZIP file in your PC in the directory [â€œC:selenium- java-2.31.0](#)â€•.

How to run your first Selenium WebDriver script - Selenium

Selenium is a chemical element with symbol Se and atomic number 34. It is a nonmetal (more rarely considered a metalloid) with properties that are intermediate between the elements above and below in the periodic table, sulfur and tellurium, and also has similarities to arsenic. It rarely occurs in its elemental state or as pure ore compounds in the Earth's crust.

Running With JUnit. To run a script *.feature file from your Java IDE, you just need the following empty test-class in the same package. The name of the class doesn't matter, and it will automatically run any *.feature file in the same package. This comes in useful because depending on how you organize your files and folders - you can have multiple feature files executed by a single JUnit test ...
