Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.

Lecture Notes on Labor Economics - CERGE-EI

Pareto efficiency or Pareto optimality is a state of allocation of resources from which it is impossible to reallocate so as to make any one individual or preference criterion better off without making at least one individual or preference criterion worse off. The concept is named after Vilfredo Pareto (1848â€“1923), Italian engineer and economist, who used the concept in his studies of ...

The view that Ludwig von Mises had more in mind in his calculation critique of socialism than the Hayekian knowlÅ-edge problem has recently been attacked by Leland Yeager. Leland Yeager, "Mises and Hayek on Calculation and Knowledge," Review of Austrian Economics 7, no.

Calculation and the Question of Arithmetic | Mises Institute

It is very easy for students to confuse the two because textbooks write an equation as, say, $y = a + bx + u$ where $u \sim N(0, \sigma^2)$. The equation is estimated and we have \hat{s} over the a , b , and u .

What is the difference between error terms and residuals

Applied economics is the application of economic theory and econometrics in specific settings. As one of the two sets of fields of economics (the other set being the core), it is typically characterized by the application of the core, i.e. economic theory and econometrics, to address practical issues in a range of fields including

A Course in Game Theory presents the main ideas of game theory at a level suitable for post-graduate and advanced undergraduate students of Economics, emphasizing the theory's foundations and interpretations of its basic concepts.

Course In Game Theory: Osborne Martin J.: 9788120351868

Game theory is the study of the ways in which interacting choices of economic agents produce outcomes with respect to the preferences (or utilities) of those agents, where the outcomes in question might have been intended by none of the agents. The meaning of this statement will not be clear to the non-expert until each of the italicized words and phrases has been explained and featured in some ...

Game Theory (Stanford Encyclopedia of Philosophy)

Within the Ph.D. in Social Science is an optional concentration in Mathematical Behavioral Sciences, supervised by an interdisciplinary group of faculty.. Within the M.A. in Social Science, students may apply directly to the concentration in Demographic and Social Analysis.
