The Deep National Hive is becoming a very popular hive in the UK. Some Bee Keepers have either modified their National hives into a Deep National or they have bought a replacement Deep National brood body to allow for the prolific queens. The supers are the smallest of all hives and so the weight of a full super is the lightest of all hives.

If the Rose OSB was the most common hive when I started beekeeping I would probably have developed my own methods and would have a different view now. There is a website with much more information, including some management techniques.

Rose OSB (one size box) hive - Dave Cushman

large stock housed in a big hive often has 80,000. Suppose 10,000 foragers go out four times a day, then in 100 days this will make four million sorties. And if each bee before returning home enters only twenty-five flowers, the bees of this hive will have visited 100 million flowers in the course of one year.

This would then really state that the rose hive is a method and not just a hive type. Its not uncommon to use a 'single box size' hive, so not sure what the advantage is on using his slightly larger box sizes, especially if you already have hives.

The Rose Hive Method: Challenging Conventional Beekeeping

The Rose hive is, in my humble opinion, a very nonrestrictive langstroth, which takes advantage of supers as brood space as well as catering to the bee's natural shape of brood chamber, the rose shape. This is why it is called the rose method.
