Most premature babies (>80%) are born between 32 and 37 weeks of gestation (moderate/late preterm), and die needlessly for lack of simple, essential care such as warmth and feeding support. About 10% of preterm babies are born 28 to <32 weeks gestation, and in low-

### y term BaB Pre Care For t - World Health Organization

To measure your premature baby's development, use his or her corrected age - your baby's age in weeks minus the number of weeks he or she was premature. For example, if your baby was born eight weeks early, at age 6 months your baby's corrected age is 4 months.

### Premature baby? Understand your preemie's special needs

After you leave the NICU, your challenges in caring for your baby may be big or small - depending on how premature your baby was at the time of birth. If you're anxious about caring for your preemie at home, remember that health care professionals do not send preemies home until the babies are ready.

### Bringing Baby Home from the NICU

When you're judging whether your premature baby is developing normally, it is important to understand their -corrected age-. The corrected age is your baby's chronological age minus the number of weeks or months they were born early. For example, a 6-month-old baby who was born 2 months early would have a corrected age of 4 months.
